TAMPERPROOF FITNESS EQUIPMENT FOR PARKS & RECREATION

OUTDOOR FITNESS EQUIPMENT FOR PARKS & RECREATION

Not everyone cares about safety, durability and tamperproof design in their exercise equipment.

OUR CLIENTS DO.

At Outdoor-Fit, we design and build the world's safest outdoor fitness equipment. We provide rugged and tamperproof outdoor fitness equipment for real exercise, that's been designed with correct biomechanics in mind. All our equipment is completely weatherproof, and can handle anything mother nature throws at it.

We've developed a reputation for tough outdoor fitness equipment that provides real workouts to even the fittest of users. We also have innovative features, like our chin/dip assist mechanism, and adjustability to make our fitness equipment accessible to beginners and casual users. Our Apollo, Helios, Titan, and Vulcan outdoor fitness multigyms and our revolutionary Everest Cardio Climber provide your community with access to fun, safe, and all-weather outdoor fitness equipment at a fraction of the cost of competitive products.

What makes our equipment tamperproof?

Only Outdoor-Fit uses completely tamperproof fasteners to bolt components together. We use rounded head stainless steel carriage bolts to attach our exercise stations to the main center column. The flanged nut for each carriage bolt is on the inside of the center column which is only accessible when the padlocked access hatch is removed. Our competitors only use tamper resistant fasteners and these are easily removed with the appropriate screwdriver.

What makes our equipment weatherproof?

To survive rain, sleet, and snow Outdoor-Fit uses the highest quality "super durable" polyester powder coating on the market. In fact, it's the same polyester powder coating used on marine buoys that are deployed in the Atlantic Ocean. In addition, the other exposed components are made from either rustproof stainless steel or aluminum.

What makes our equipment safe to use?

Outdoor-Fit has eliminated any pinch point or entrapment areas so that each user can exercise safely. In addition, our equipment has been tested and approved by the Dalhousie University Biodynamics, Ergonomics and Neuroscience Lab.

Why is our equipment the least expensive to install?

Each Outdoor-Fit multigym or cardio piece only requires a small floating concrete pad unlike our competitors who make single station exercise pieces that require larger concrete pads and/or multiple "frost depth" concrete footings. Installing single station pieces can get very expensive.

Why does our equipment deliver better exercise results for users?

The Outdoor-Fit product design team comes with extensive commercial fitness equipment experience. Each of our exercise stations mimics the exercise biomechanics found on top quality indoor commercial fitness equipment.

OUR PRODUCTS

APOLLO
MULTIGYM

5 Simultaneous Users
Our Flagship Product, Packed with Features

HELIOS
MULTIGYM

4 Simultaneous Users
The Original MultiGym

VULCAN

BIOMECHANICALLY CORRECT, TAMPERPROOF FITNESS EQUIPMENT

We manufacture the world's greatest indoor/outdoor fitness equipment and multigyms.

We are trusted by hundreds of correctional facilities & park installations across North America to provide safe, effective and durable products.

PARKS & RECREATION SHOWCASES

“ We chose the Helios for its versatility, compact design and durable construction. The system is extremely durable, simple to install, and has received rave reviews by our citizens and park trail patrons! Our citizens will be able to use this equipment in support of a healthier lifestyle for many years to come. ”
